1. Can an animal get sick or have an allergic reaction to Mitomax®?

No. Because Mitomax® contains micro-organisms naturally found in a pet's intestinal tract, it is impossible for a pet to get sick from this product. Mitomax® is completely natural and 100% safe.

2. How often should Mitomax® be administered?

For best results, Mitomax® should be given on a daily basis.

3. How should I administer Mitomax?

Mitomax® is packaged in soft, gel tablets for easy administration. Simply wrap the capsule in a treat or mix it in the pet's food. The capsules ensure that pets will receive a consistent dosage, which will yield reliable results.

4. How long does Mitomax® take to work?

Each capsule of Mitomax® is packed with millions of microorganisms. This enables the product to work quickly. You will most likely see results within 1-2 days.

*In a research study with the University of Maryland, Mitomax® was scientifically shown to have a longer shelf life at room temperature or 4 degree Celsius.

**In a research study with the USDA, Mitomax® was scientifically shown to stimulate the immune response and eliminate parasites in animals.

Mitomax® has Helped Enhance the Health of Dogs and Cats around the World

"We have used Mitomax at our boarding facility to help dog's deal with separation anxiety and enhance their overall health. The results have been amazing. Mitomax® has helped relieve diarrhea, encourage a hearty appetite, and make uptight dogs feel calm and relaxed. We've given Mitomax® to approximately 70-80% of dogs who have visited our facility for the first time. None of these dogs developed diarrhea or extreme anxiety during their stay. One of the great things about Mitomax is it seems to work quickly. Not only does Mitomax® work extremely well, it is also easy to administer. We were able to incorporate Mitomax® into the pets' food with little difficulty. I would heartily recommend this product to any boarding facility looking to improve their service. It is just one more way to show customers that you truly care about their pets. It's extremely cost-effective too. You can easily pass the expense on to your clients by charging a modest fee for daily administration."

Mitomax®

Premium Pet Probiotics

For Maintaining Healthy Pets

Imagilin Technolog , LLC.

93 Monocacy Blvd., Ste A9
Frederick, MD 21701
(P) 240.436.6084
(F) 240.436.6085

Now You Can Keep the Pets at Your Boarding Facility Healthy and Happy

When you are responsible for other people's animals, you want to be sure they receive the best care possible. Mitomax® can help promote exceptional, long-lasting health among cats and dogs. This all natural supplement can help:

- Support the digestive system
- Prevent diarrhea and vomiting
- Enhance the immune system
- Alleviate separation anxiety and nervousness
- Eliminate body odor and dry, itchy skin

A Ground-Breaking Product

Mitomax® is a powerful probiotic that was developed from sound, scientific principles. Probiotics are live beneficial microorganisms that are naturally found in a pet's gastrointestinal tract. Scientific studies have proven that probiotics can help relieve stress, anxiety and digestive disorders.

A Special Microorganism

Mitomax® contains a special microorganism that is not found in any other commercial product. It is called *Pediococcus*. *Pediococcus* is a powerful substance that enhances overall health and enables the digestive tract to function smoothly and properly. Because *Pediococcus* is extremely resistant to oxidative damage and warm temperatures, pets are able to fully digest the product and reap the nutritional benefits.

Enhancing the Health of Pets

As pet care professionals, Mitomax® is one way you can promote exceptional health among cats and dogs. This product is as natural and beneficial as providing pets with fresh air and exercise. By offering Mitomax® as part of your overall pet care package, you will not only help animals live a healthier, happier life, you will also communicate to your customers just how much you care about their beloved pets.

Increase Your Income

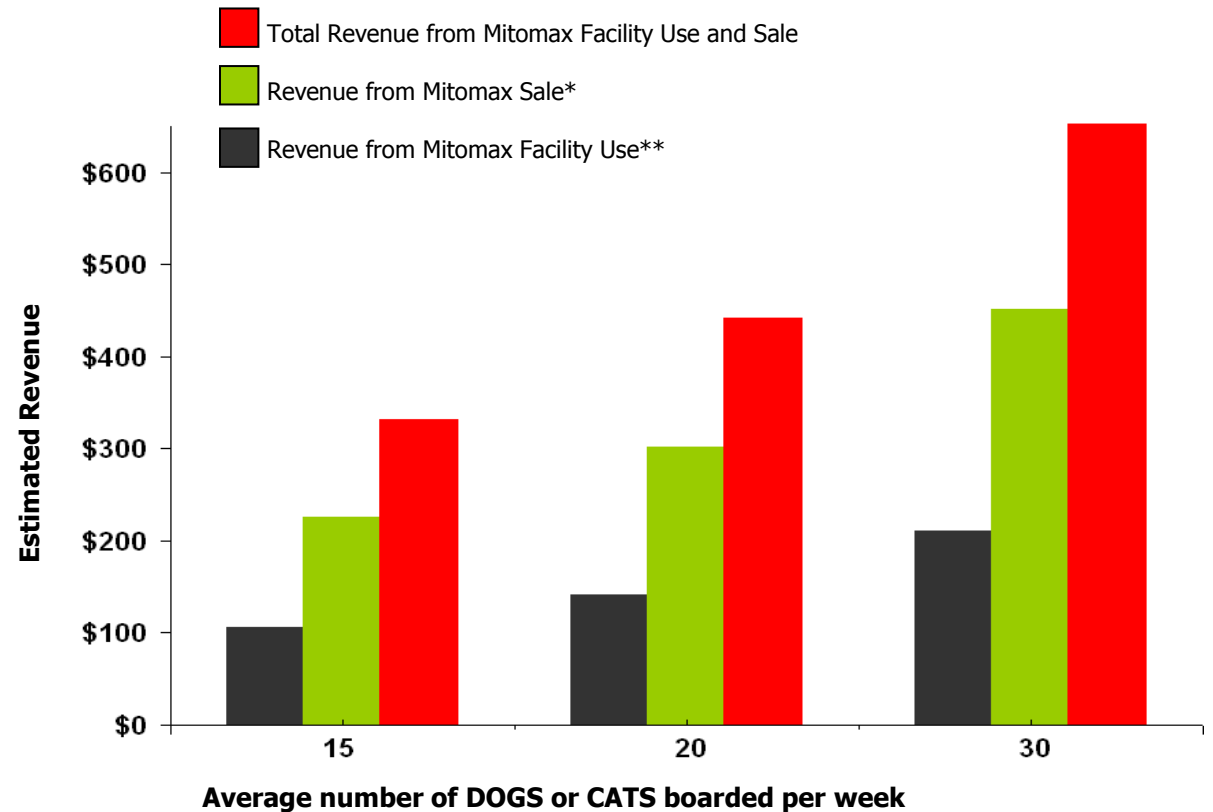

By administering Mitomax® to the pets at your facility, you can increase your annual income in two ways. Number one, you can raise your rates to reflect the quality of care you provide. We recommend charging an additional \$1-\$2 extra per day. You can also sell

Mitomax® directly to your customers. This will help you create an additional stream of income with no extra work. Because Mitomax® is so beneficial to a pet's health; your customers will want to make sure their pet receives this supplement every day.

Estimated Revenue from Mitomax®

*Based on recommended \$14.99 sale price for a 15 capsule bottle of Mitomax

**Based on recommended \$1.00 charge a capsule of Mitomax for facility use a day
